**** IMPORTANT ****

PLEASE NOTE THAT THE FOLLOWING ARE EPA SITE ASSESSMENT PROGRAM REVIEW COMMENTS. STATE (ME DEP) COMMENTS WILL BE FORWARDED TO YOU SEPARATELY UPON RECEIPT. IF YOU HAVE NOT RECEIVED STATE COMMENTS BY THE END OF THE REVIEW PERIOD, PLEASE CONTACT THE EPA SAM BEFORE FINALIZING THE REPORT.

I have reviewed the draft SI report and have the following comments:

Overall, this is a very well-written, comprehensive report.

Page 4, Figure 2, What is the meaning of the kidney shaped area circled at the far right side of this figure? It appears to encompass the wetland area and some forested areas. Does this area have special significance not explained in the text? Include an explanation in the legend to the figure as well as the report text.

Page 10, Clarify in the description of the surface water migration pathway that upon reaching the Atlantic Ocean, the pathway continues in a arc for the remainder of the 15 mile distance. Identify the points along the northern and southern coastlines which mark the intersection of the arc and land. Offshore islands must also be taken into account in describing the arc.
